02

Who you are

Your nature

You carry yourself with natural dignity and people notice when you walk into a room. You like to lead, to be respected and to do things in a big, generous way. You are warm-hearted and loyal to the people you love, and you expect the same loyalty back. Your pride is strong: criticism in public hurts you deeply, and you will work very hard to protect your name and reputation.

You typically have a commanding presence, a strong upper body and an upright posture.

Your inner world

Emotionally you are independent and a little detached. You care about people and causes, but you need your own space and freedom of thought. You do not like being told how to feel. Friends play a big role in your emotional life. Born under Shatabhisha, you are private, independent and original — a natural healer and researcher who solves problems others cannot.

How you think, act and love

You think slowly and practically, and once you understand something you never forget it. You find your purpose through learning, communication and connecting people.

Your energy rises and falls with your mood, and you work best when you are inspired. In love you are passionate and direct — you go after what you want.

07

Marriage and relationships

Your spouse

Your spouse is independent, friendly and a little unconventional. Marriage involves work and adjustment. You may meet through work or service, and the relationship needs care to avoid disputes and health strain.

Love or arranged

Your chart leans toward an arranged or family-introduced marriage, or a match that grows out of friendship and family approval rather than a whirlwind romance.

Married life

Married life is mixed: warm and supportive in good phases, with some tests of patience and adjustment along the way.

Mangal Dosha

Mangal Dosha is present from both the ascendant and the Moon. Traditionally this brings friction, delay or heat into married life, and Vedic matching strongly advises a partner who also has Mangal Dosha. Marriage after 28 is traditionally considered safer. Traditional remedies include reciting the Hanuman Chalisa on Tuesdays and matching with a partner who has a similar Mars placement.

When marriage happens

Your strongest marriage window was Jul 2012 – Mar 2015 (age 22–24). The peak months were Nov 2014 – Mar 2015.

Because Mangal Dosha is strong in your chart, traditional astrologers would favour the later window, Feb 2023 – Dec 2025, or advise careful chart matching before an early marriage.

- Feb 2023 – Dec 2025 (age 32–35) was a strong period for love and partnership. If you are already married, this brings a happy, strengthening phase in the marriage; if not, marriage itself is indicated. The peak months were May 2024 – Apr 2025.
- Jun 2028 – Nov 2030 (age 38–40) will be a very strong period for love and partnership. If you are already married, this brings a happy, strengthening phase in the marriage; if not, marriage itself is indicated. The peak months are Jul 2028 – Jan 2030.

08

Career, business and money

Your working style

At work you are steady and dependable, and you build value slowly. Finance, design and anything tangible suits you. Your career is fortunate and brings respect. Mentors, higher education, law, teaching or long-distance work raise you up.

Best fields for you

Your chart points most strongly to manufacturing, industry, mining, oil, labour-intensive work or large organisations — and also commerce, IT, accounting, writing, media or communication.

Job or business?

You can succeed in both a job and a business. Many people with your chart build a career first and then move into business; the best lines for you are trading, IT services, consultancy, publishing, e-commerce or brokerage — and also fashion, beauty, jewellery, design, entertainment, luxury goods or vehicles.

Yogas and doshas in your chart

Raja Yoga

Raja Yoga is a combination for rising in status and authority. When its planets run their periods, promotions, recognition and leadership come.

Doshas

Mangal Dosha is covered in the marriage section.

14

Past-life karma

In Vedic astrology the two lunar nodes describe the soul's journey: Ketu shows what you bring from past lives, and Rahu shows what this life asks you to develop.

What you bring from the past

In past lives you lived a spiritual or secluded life, perhaps in a monastery or far from home. You have natural talent in this area, but over-relying on it holds you back.

What this life asks of you

In this life your growth comes through practical service, health and showing up in the everyday world. Moving in this direction feels unfamiliar at first, and it brings your biggest growth.

Method

Positions are calculated with the Swiss Ephemeris (geocentric, sidereal, Lahiri ayanamsa, mean nodes, whole-sign houses). Periods use the Vimshottari system with 365.25-day years. Event windows combine the houses ruled and occupied by the running main and sub-period planets, their natural significations and strength, and the classical Jupiter–Saturn double-transit rule. Sade Sati is Saturn's transit through the 12th, 1st and 2nd signs from the natal Moon.
